Who I Am

SIVJENA HATELLARI

I am a Software Engineering student at Western Balkans University with a deep-rooted passion for visual storytelling.

My journey in tech began at the 'Hermann Gmeiner' ICT school, where I maintained a perfect average of 10. Today, I bridge the gap between complex code (C++, Java) and elegant design (Adobe Creative Suite) to build digital experiences that are as functional as they are beautiful.

What I Do

I offer a unique blend of technical precision and creative vision. My background in Software Engineering allows me to build robust, logical systems, while my specialized training in Graphic and Web Design ensures those systems are delivered with high-impact visual identities. From developing custom code to crafting cohesive brand stories like Hermosa, I focus on creating digital solutions that are both functional and aesthetically compelling.

Software Development

Building logical systems in Spring Boot, JavaFx and Java.

Graphic Design

Creating visual identities and Adobe-based assets.

Social Management

Managing professional accounts and digital blogs.

Web Design & UI

Designing responsive layouts using HTML and CSS.

Experience

01. International Internship | Sevilla, Spain

2024

Managed digital presence for a Spanish social agency. Tasks included social media account management, blog content creation, and analyzing service performance in a professional, cross-cultural environment.

02. Graphic & Web Design | Dominusoft

2024 - Web Design

2025 - Graphic Design

Completed a 3-month intensive, licensed training. Mastered the Adobe Creative Suite (Photoshop, Illustrator, InDesign) and front-end development, culminating in the creation of the Hermosa and Sushi projects.

Experience

03. Robotech School | Robotics Training

2023

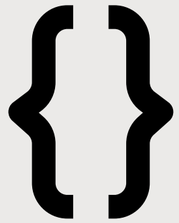

Participated in a specialized 5-day intensive focused on robot mechanics and programming, expanding my engineering perspective into hardware and automation.

04. Code For Albania | AlphaPlan & Code.X

2020

Selected for a high-level coding program. Focused on advanced logic and collaborative software development, strengthening my foundation in C# and system architecture.

Communication

My Process

Discovery

1

Analyzing & Planning.
I start by defining the project scope, identifying the target audience, and gathering technical requirements to ensure a solid foundation.

Ideation

2

Conceptualizing.
This is where logic meets art. I brainstorm software architectures or visual metaphors, selecting the right colors, fonts, or code structures.

Development

3

Execution.
Using the Adobe Creative Suite for design or IDEs like Visual Studio for coding, I build out the high-fidelity version of the project.

Delivery

4

Testing & Polishing.
The final stage involves debugging code or refining visual assets (posters, cards, UI) to ensure a flawless user experience.

Project 1

SIVJENA HATELLARI

Hermosa Branding

A comprehensive branding project for a modern hair care line. The concept utilizes a signature 'H' symbol—merging three hair-like strokes—to represent movement and health. I curated the typography and a sophisticated palette to reflect luxury and elegance.

Project 2

SushiGo

For this project, I designed and developed a digital menu and reservation platform for a contemporary Sushi restaurant. The challenge was to balance a minimalist aesthetic with high-impact food photography to create an 'appetizing' user experience. Using HTML and CSS, I focused on a clean grid system for the menu and a seamless navigation flow that guides the user from the chef's specials to the final booking stage.

About Us

Who are we?

With years of experience and a deep appreciation for the art of sushi-making, our talented staff takes pride in every dish they create. From meticulously selecting the freshest fish and ingredients to crafting each roll with precision and care, we strive to bring you the true flavors of Japan.

Project 3

MyFly

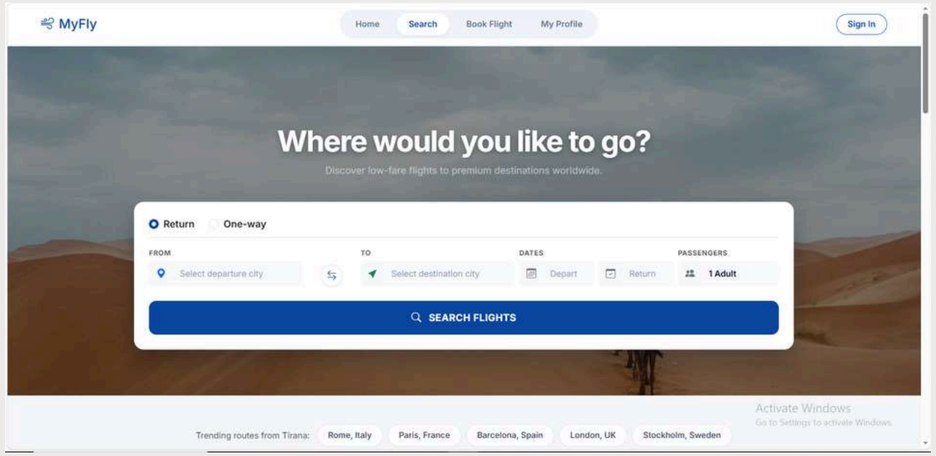

MyFly is a complete end-to-end flight booking platform built with Java Spring Boot. Users can register an account, search for available flights, complete a multi-step booking, and manage their entire travel history from a personal profile dashboard.

The platform supports two roles — passengers and administrators — each with a fully tailored experience and isolated data.

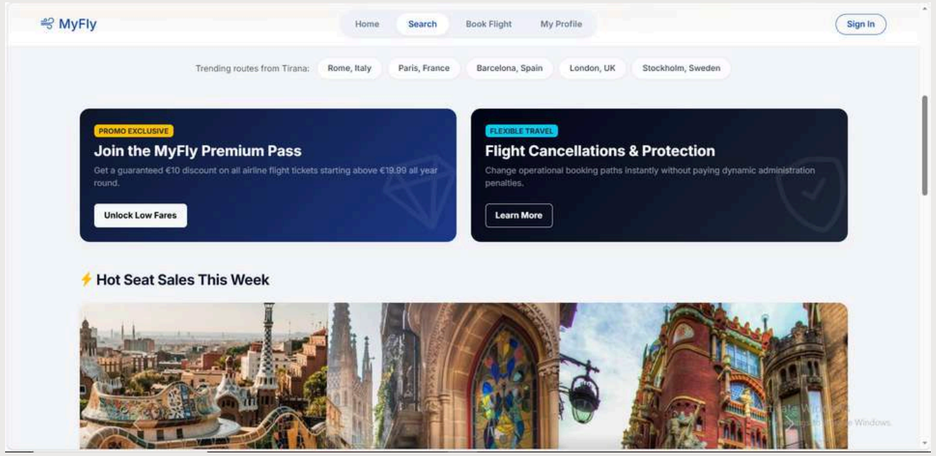

Technologies: Java 21, Spring Boot, Spring MVC, Hibernate/JPA, Maven, Thymeleaf, HTML5, CSS3, JavaScript, Bootstrap 5, and MySQL.

Overview Dashboard

Flight Operations

Other Work

Competition: Heronjtë në grafikë (Heroes in Graphics)

A graphic design entry exploring national identity and the legacy of heroism. The work focuses on the symbolic power of the flag as a vessel for history and the stories of those who defended it.

- Thematic Design: Translating historical concepts into visual storytelling.
- Conceptual Branding: Creating a strong narrative identity through title and visual impact.
-
- Illustration: Initial conceptualisation and detailing using pen and ink techniques.
- Digital Editing: Final composition and refinement using Adobe Illustrator and Photoshop.

Other Work

Poster: Spring Fest

A vibrant visual identity and promotional poster designed for the Western Balkans University (WBU) Spring Festival. The design captures the energetic, refreshing spirit of spring through a rich, layered collage of typography, floral elements, and wildlife, creating an inviting and celebratory atmosphere for the campus community.

- Visual Concept: Blending bold, clean typography with organic, colorful imagery to symbolize growth, energy, and community.
- Creative Execution: Detailed digital compositing and precise color grading to ensure a balanced, high-impact layout across digital and print media.
- Tools Used: Designed and refined using Adobe Illustrator and Photoshop.
